Enterprise vCISO Program — Ultra Edition

Strategic Cybersecurity Leadership for High-Growth & Enterprise Organizations

1. EXECUTIVE SUMMARY

The Ultra Enterprise vCISO Program from Cypentra provides full cybersecurity leadership, governance, compliance, and operational oversight for organizations that require executive-level security maturity. This program aligns security initiatives with business goals, ensuring regulatory compliance, reduced cyber risk, and stronger resilience.

2. CYBERSECURITY GOVERNANCE FRAMEWORK

Cypentra’s vCISO governance model aligns with NIST CSF, ISO 27001, and SOC 2 frameworks to ensure unified security management across the organization. Governance domains include:

• Governance & Leadership • Risk Management • Compliance & Audit Readiness • Security Architecture Oversight • Identity & Access Governance • Cloud Security Strategy • Incident Response & Crisis Management • Vendor Risk Management • Business Continuity & Disaster Recovery

3. NIST CSF ALIGNMENT

Function	Purpose
Identify	Understand business environment, assets, risk and governance.
Protect	Implement controls to safeguard assets.
Detect	Enable monitoring and logging for threats.
Respond	Prepare for effective incident response.
Recover	Ensure resilience and continuity after incidents.

4. SOC 2 + ISO 27001 + GDPR CONTROL MAPPING

The vCISO program includes alignment of organizational controls to multiple frameworks, ensuring full compliance readiness:

• SOC 2 Trust Services Criteria • ISO 27001 Annex A Controls • GDPR Articles & Recitals • NIST CSF Functions & Categories • Cloud provider CIS Benchmarks (AWS, Azure, GCP)

5. SECURITY KPI & KRI REPORTING

Monthly executive dashboards include both quantitative (KPI) and risk-based (KRI) indicators:

• Incident frequency & response time • Vulnerability closure rate • Compliance progress status • Access review performance • Vendor security ratings • Backup and DR test results • Cloud misconfiguration trends

6. SECURITY ARCHITECTURE OVERSIGHT

The vCISO oversees cloud architecture decisions to ensure security-by-design:

• Network segmentation and VPC architecture • Zero Trust identity design • CI/CD pipeline security • Data flow mapping & encryption design • IAM and least privilege compliance • WAF, SIEM, and monitoring strategy

7. INCIDENT RESPONSE & CRISIS MANAGEMENT

The program includes full oversight of incident response strategy:

• Incident Response Plan creation • Crisis communication playbooks • Tabletop exercises (quarterly) • Forensic coordination support • Attack simulation workshops

8. BUSINESS CONTINUITY & DISASTER RECOVERY

Ensuring the business can continue operating during and after disruptions:

• DR plan creation & review • RPO/RTO definitions • Cloud DR architecture validation • Backup strategy oversight • Failover testing guidance

9. 12-MONTH PROGRAM ROADMAP

0–90 Days: Initial risk assessment, policy baseline, access governance, cloud security foundations. **90–180 Days:** Compliance alignment, monitoring/transparency, vendor management updates. **180–365 Days:** Full governance maturity, KPI/KRI reporting dashboards, audit readiness, continuous improvement cycles.

10. vCISO RACI MATRIX

Function	vCISO	CTO	Security Eng.	Ops
Security Strategy	A/R	C	I	I
Cloud Governance	A/R	C	R	I
Incident Response	A	C	R	R
Compliance	A/R	C	I	I
Vendor Security	A/R	C	I	R

11. ENGAGEMENT TERMS — NDA + NO LONG COMMITMENT

• NDA signed before all work begins. • No long-term contract required. • Monthly or quarterly engagement options. • Cancel anytime without penalty.
